- ❖ ISRO on January 29, 2025 launched its historic 100th launch from the Satish Dhawan Space Centre in Sriharikota.
- ❖ Chinese scientists claim to have developed the world's first seabed 'radar' capable of detecting high-altitude aircraft.
- ❖ NASA's James Webb Space Telescope (JWST) and the Chandra X-ray observatory has discovered a bizarre black hole LID-568.
- ❖ Recently, Deep Seek launched its AI models—DeepSeek-V3 and DeepSeek-R1, a reasoning model.
- ❖ Astronomers have discovered a gigantic black hole named Gaia BH3 hiding close to the earth, the third of its kind.
- ❖ Scientists have successfully produced the first kangaroo embryos through in vitro fertilisation (IVF).
- ❖ The ICAR-Indian Institute of Spices Research (IISR) have identified a new fungal disease, Pyricularia Spp, that severely affected ginger crops.

- ❖ Russia has offered India to replace the R-77 air-to-air missile under the wings of the Su-30MKI with the R-37M missile.
- ❖ The 20-qubit quantum computer, called Reimei, has been integrated into Japan's Fugaku.
- ❖ Ukraine has reportedly acquired a new weapon system - the Gravehawk hybrid surface-to-air missile system.
- ❖ ISRO successfully developed a 10-tonne 'vertical planetary mixer', the largest of its kind for solid propellants globally.
- ❖ In January, the web-based portal Kaveri 2.0, which streamlines the property registrations in Karnataka, faced sporadic, crippling server outages.
- ❖ The Microsoft has announced the arrival of Majorana 1, a new quantum chip that produces more reliable and scalable qubits than its predecessors.
- ❖ Recently, the Euclid space mission of the European Space Agency (ESA) spotted an Einstein ring in the galaxy NGC 6505.
- ❖ IIT-Madras have tasted success in extracting the silicon carbide from (simulated) moon soil.
- ❖ South Africa's MeerKAT telescope has discovered a new giant radio galaxy, nicknamed 'Inkathazo,' meaning 'trouble'.
- ❖ The Researchers from the IIT -Guwahati and the Bose Institute, Kolkata have developed an advanced injectable hydrogel for localised cancer treatment.
- ❖ India and the US have announced plans to pursue the new procurements and co-production arrangements for Javelin anti-tank guided missiles.
- ❖ The Indian scientists have developed an innovative method to minimise anion migration in perovskite nanocrystals.
- ❖ Glucagon-like peptide-1 receptor agonists (GLP-1RAs) are novel drugs approved for diabetes and obesity.
- ❖ A team of the scientists from the Physical Research Laboratory in Ahmedabad discovered a giant planet TOI-6038A b that is bigger than Earth but smaller than Saturn.
- ❖ IIT Madras Launches Bharat Cancer Genome Atlas (BCGA) is a First-of-Its-Kind Cancer Genome Database to Transform Cancer Research in India.
- ❖ The Bharat Biotech group firm Biovet has received the Central Drug Standards Control Organization (CDSCO) licence for the lumpy skin disease (LSD) vaccine – BIOLUMPIVAXIN.
- ❖ China's Zhurong rover has made a stunning discovery on the rugged terrain on Mars.
- ❖ India has successfully test fired a first-of-its-kind naval anti-ship missile from Chandipur off the coast of Odisha.

- ❖ Firefly Aerospace, a US company, successfully landed its spacecraft on the Moon.
- ❖ India's Aditya-L1 mission has captured the very first-ever image of a solar flare of 'kernel.'
- ❖ The Scientists have created a new gene therapy for a debilitating genetic disorder called maple syrup urine disease (MSUD).
- ❖ The Billionaire Jeff Bezos' space company Blue Origin launched its 10th space tourism mission.
- ❖ ISRO recently successfully conducted the hot test on a semi-cryogenic engine (SE2000).
- ❖ Scientists have now confirmed a fourth form of ice, called Plastic Ice VII.
- ❖ China has deployed a powerful Large Phased Array Radar (LPAR) in the Yunnan province.
- ❖ Scientists have reported observations of a flareless coronal mass ejection (CME) from the solar atmosphere.
- ❖ The Scientists at the CSIR-NBRI in Lucknow claim to have developed the world's first genetically modified (GM) cotton.
- ❖ The ESA's European Space Operations Centre switched off the Gaia spacecraft's subsystems and sent it into a 'retirement orbit' around the Sun.
- ❖ The ISRO has announced significant progress in the design and development of a Semi cryogenic engine or Liquid Oxygen/Kerosene engine with a high thrust of 2,000 kN (kilonewton).
- ❖ Small satellite manufacturing company HEX20 became the State's first startup to partnered with SpaceX for launching its maiden satellite 'Nila'.
- ❖ Elon Musk's brain chip startup Neuralink aims to have its artificial visual prosthesis, Blindsight, implanted in a human for the first time by the end of 2025.
- ❖ The privately funded Fram2 human space mission has successfully completed its journey and splash down in California coast of USA.
- ❖ The upper stage (PS4) of PSLV-C60 (PSLV Orbital Experimental Module – POEM - 4), which was launched by ISRO, was re-entered the atmosphere recently.
- ❖ The ICAR – Indian Institute of Spices Research (IISR) has developed a new light-coloured turmeric variety for the masala industry.
- ❖ The crew of the Soyuz MS-26 spacecraft, consisting of Oleg Ovchinin, Ivan Vagner, and Donald Pettit, landed in the Jezkazgan area in Kazakhstan.
- ❖ DRDO has revealed a mock-up and details of the country's latest short-range ballistic missile called BM-04.
- ❖ China has inaugurated the Three Gorges Antarctic Eye telescope in Antarctica.

- ❖ The black rats, an invasive species – are the sole carriers of hantavirus, the very deadly virus, in the rural parts of Madagascar.
- ❖ Chandra's Surface Thermophysical Experiment (ChaSTE) has become the first instrument to measure temperatures in situ near the moon's south pole.
- ❖ In a first, the National Aerospace Laboratories (NAL) has signed a technology transfer agreement with a private company to manufacture trainer airplanes in India.
- ❖ Niallia tiangongensis bacterium, never before seen on Earth, was detected on China's Tiangong space station.
- ❖ A major solar eruption, also called the "bird-wing" event was detected recently.
- ❖ Chandrayaan-5, also known as LUPEX (Lunar Polar Exploration), is a joint project between ISRO and JAXA.
- ❖ The Spanish technology company GMV unveiled a GPS-like navigation system for the moon, it is named as LUPIN; the project is part of a programme by the European Space Agency.
- ❖ India's AI-driven, fully automated 'Akashteer' air defence system, was developed indigenously by Bharat Electronics Limited (BEL).
- ❖ Pop singer Katy Perry and five other women launched into space on a Blue Origin rocket and successfully returned to Earth, marking the first all-female spaceflight in more than 60 years.
- ❖ Bengaluru-based QpiAI has launched India's first full-stack quantum computer, QpiAI-Indus.
- ❖ The first 27 satellites for Amazon's Kuiper broadband internet constellation were launched into space.
- ❖ Astronomers have detected a possible biosignature, or signs of past or present life linked to biological activity, on an exoplanet named K2-18b.
- ❖ India successfully carried out maiden flight-trials of a stratospheric airship platform.
- ❖ The Scientists have mapped the genome of the saola (Pseudoryx nghetinhensis), the rarest large land mammal in the world.
- ❖ The Indian Navy has received its first Anti-Submarine Warfare Shallow Water Craft (ASW SWC), named 'Arnala'.
- ❖ The Chinese Scientists have created the first-ever Asian rice pangenome, encompassing genetic data from 144 wild and cultivated rice varieties.
- ❖ New research suggests that Earth's first crust Hadean Protocrust formed over 4.5 billion years ago.

- ❖ The DRDO successfully tested a Mk-II(A) Laser – Directed Energy Weapon (DEW) system.
- ❖ A new microscopy method named as the light-microscopy-based connectomics (LICONN), has been developed by the Austrian scientists.
- ❖ The New findings have revealed that the landing site (Shiv Shakti point) of the Chandrayaan-3 mission is a promising site to access primitive mantle samples.
- ❖ DeepMind has developed a new AI tool called AlphaGenome predicts how changing one DNA letter affects gene expression.
- ❖ The Group Captain Shubhanshu Shukla becomes the second Indian to travel to space.
- ❖ Google has launched AI Mode in India, the first country outside the US to get it.
- ❖ Pune's National Institute of Virology has found that the anti-viral drug Favipiravir could help protect against the Chandipura virus.
- ❖ The Hindustan Aeronautics Limited (HAL) wins the bid for SSLV technology transfer from ISRO.
- ❖ Voyager 1 has encountered a region dubbed a "wall of fire" at the edge of our solar system.
- ❖ France has identified a completely new blood group system "Gwada negative".
- ❖ The Scientists from Centre for Nano and Soft Matter Sciences (CeNS), Bengaluru, have developed a next-gen green hydrogen device.
- ❖ BSNL has soft-launched Quantum 5G Fixed Wireless Access (FWA) in Hyderabad.
- ❖ The scientists from the Indian Institute of Astrophysics (IIA), Bengaluru, have identified Extreme Helium in Star – A980.
- ❖ NASA's Voyager 1 spacecraft has detected a shell of superheated plasma at the heliopause.
- ❖ The U.S. has successfully used a technique called step-and-shoot spot-scanning proton arc therapy (SPArc) to treat a patient's adenoid cystic carcinoma (ACC) for the first time.
- ❖ For the first time, the researchers detected the universe's missing ordinary matter using powerful cosmic signals known as Fast Radio Bursts (FRBs).
- ❖ IISER – Bhopal have found that a single protein called BBX32 Protein which helps plants time their first step from darkness into light.
- ❖ The first ever video and images of the Sun's south pole have been sent back to Earth by the European Space Agency's Solar Orbiter spacecraft.
- ❖ The Indian Army has successfully conducted trials of the Rudrastra, a vertical take-off and landing (VTOL) UAV designed for deep-strike missions.

- ❖ India's First Agri-Drone Indigenization Facility, which was built by Garuda Aero space, was inaugurated at Chennai.
- ❖ The Scientists have discovered a new species of dinosaur *Khankhuuluu mongoliensis* – Dragon Prince – in the collection of a Mongolian museum.
- ❖ TOI-6894b gas giant planet, roughly the size of Saturn, has been found orbiting a very unusually small red dwarf star.
- ❖ Specialists from four institutions of the Indian Council of Agricultural Research (ICAR) have assembled the first-ever chromosome-level genome of the Indian yak.
- ❖ Scientists in China have successfully fabricated atomically thin 2D metal sheets of bismuth, gallium, tin, and lead using a novel high-pressure technique.
- ❖ The Nuclear physicists have detected the radioactive disintegration of a rare isotope of astatine for the first time.
- ❖ The Scientists in Germany have achieved a major milestone in limitless energy through nuclear fusion with the Wendelstein 7-X reactor.
- ❖ Resilience, a lander built by Japan-based Pvt company Ispace, crashed into the lunar surface.
- ❖ The Group Captain Shubhanshu Shukla of the Indian Air Force became the first Indian in over four decades to travel to space and board the International Space Station (ISS), as part of Axiom Space's Ax-4 mission.
- ❖ KATRIN has set a new global benchmark in the field of direct neutrino mass measurements.
- ❖ Researchers from India sampled six jarosite veins from Kachchh in Gujarat.
- ❖ The Gravity Recovery and Interior Laboratory (GRAIL) mission aimed to map the Moon's gravitational field.
- ❖ Japanese scientists have developed a new type of plastic that dissolves quickly in seawater, leaving no harmful residue.
- ❖ The researchers from Vellore Institute of Technology (VIT) studied the Rajgir hot spring in Nalanda, Bihar and discovered thermophilic Actinobacteria.
- ❖ 2017 OF201 – New distant dwarf planet has been discovered at the edge of our solar system.
- ❖ China is building the world's first supercomputer network in space, for which it launched 12 AI-powered satellites recently.
- ❖ Researchers at the Indian Institute of Science (IISc) have developed an artificial metal-based nanozyme.
- ❖ Novavax (Nuvaxovid) has secured a full FDA of USA approval for its protein-based COVID-19 vaccine.
- ❖ The US approved a new COVID-19 vaccine mNexspike, made by Moderna.

- ❖ Israel has become the first country in the world to use laser weapons to shoot down enemy drones during the ongoing war in Gaza.
- ❖ Sher-e-Kashmir University of Agricultural Sciences and Technology (SKUAST) at Jammu have produced India's first gene-edited sheep.
- ❖ The baby, KJ Muldoon from Pennsylvania of USA, is one of 350 million people worldwide with a rare disease – CPS1 deficiency, this baby became the first to successfully receive personalized CRISPR gene therapy.
- ❖ China launched a space probe Tianwen 2 on the country's first mission to retrieve samples from an asteroid and bring back for research.
- ❖ The Indian Council of Medical Research (ICMR) recently developed India's first ICMR-SCD Stigma Scale for India (ISSSI).
- ❖ The DRDO has successfully developed an indigenous nano-porous multi-layered polymeric membrane for high-pressure seawater desalination.
- ❖ The Scientists used lasers and X-rays to study liquid carbon, which forms under extreme heat and pressure.
- ❖ IIT – Guwahati developed a bamboo-polymer composite using Bambusa tulda and biodegradable polymers as a plastic alternative.
- ❖ GRS 1915+105 is located 28,000 light-years away and exhibits dynamic and unusual behavior.
- ❖ Turkey's Tayfun Block-4 is its first hypersonic ballistic missile, developed by defence firm Roketsan.
- ❖ NASA's Tandem Reconnection and Cusp Reconnaissance Satellites (TRACERS) mission launched aboard a SpaceX Falcon 9 rocket.
- ❖ DRDO has successfully conducted flight trials of the Unmanned Aerial Vehicle Launched Precision Guided Missile (ULPGM)-V3 in Kurnool, Andhra Pradesh.
- ❖ Astronomers observed early planet formation around baby star HOPS-315 in the Orion constellation.
- ❖ India is developing a Multi-Stage Malaria Vaccine named AdFalciVax.
- ❖ The first experimental evidence of the breaking of charge-parity (CP) symmetry in baryons has been obtained by CERN's LHCb Collaboration.
- ❖ The short-range ballistic missiles — Prithvi-II and Agni-I — were successfully test-fired from the Integrated Test Range in Chandipur, Odisha.
- ❖ NASA, and other international solar physicists, will launch a sounding rocket Solar Eruption Integral Field Spectrograph (SNIFS) experiment from New Mexico.
- ❖ NASA has discovered a new planet called TOI-1846 b, located 154 light-years from Earth.

- ❖ The Scientists from the Raman Research Institute (RRI) have discovered quantum noise.
- ❖ Chinese scientists have created the world's lightest brain controller (74 mg) to turn real bees into cyborgs for potential military use.
- ❖ The Scientists detected the most massive black hole merger ever recorded using gravitational wave detectors.
- ❖ Israel launched its first fully government-funded and locally built communication satellite, Dror-1.
- ❖ The HAYSTAC (Haloscope at Yale Sensitive to Axion Cold Dark Matter) experiment is a leading research initiative aimed at detecting axions.
- ❖ Astronomers have detected 11 new Active Galactic Nuclei (AGNs) during their all-sky X-ray surveys.
- ❖ The Scientists from the Nagaland University develop supercapacitor material that charges faster, lasts longer.
- ❖ Researchers have created a new catalyst designed to make crucial oxygen-related catalytic reactions faster, more affordable, and efficient.
- ❖ IIT Madras-led research team develops the biosensor for pre-eclampsia testing in pregnant women.
- ❖ A team of NASA scientists has proposed the deployment of a Quantum Gravity Gradiometer (QGG) onboard a satellite in low-Earth orbit.
- ❖ An international team of solar physicists, including the scientists from the Indian Institute of Astrophysics (IIA), has mapped dynamic plasma currents in the Sun's Near-Surface Shear Layer (NSSL).
- ❖ Taurus Molecular Cloud 1 (TMC1) contains many small, closed-shell PAHs that surprisingly survive intense starlight.
- ❖ The Kerala State Electricity Board (KSEB) and the Indian Institute of Technology Bombay (IIT Bombay) have initiated a pilot project to explore the implementation of Vehicle-to-Grid (V2G) technology across the State.
- ❖ NASA's Curiosity rover has discovered siderite mineral deposits on Mars.
- ❖ The South Eastern Coalfields Limited (SECL) is becoming the first coal PSU to implement paste fill technology for underground coal mining.
- ❖ ISRO has successfully tested an indigenous Stellite (KC20WN) alloy nozzle divergent for the PSLV's fourth stage.
- ❖ The Indian scientists at JNCASR, Bengaluru, have developed a super-fast charging sodium-ion battery (SIB).
- ❖ The Central Electricity Authority (CEA) launched STELLAR, an indigenously developed tool to help states and power companies plan electricity generation, transmission, storage, and demand management.

- ❖ BatEchoMon is India's first automated bat monitoring, detection system.
- ❖ CSIR–Central Leather Research Institute (CLRI), Chennai, have recently developed specialised Nano–sized particles called Cu–Phen.
- ❖ The Scientists have developed a green water–based method to recycle the toxic perovskite solar cells.
- ❖ Alyssa Carson (24) of USA is aiming to be one of the first humans on Mars and has completed all NASA Space Camps and advanced space training programs.
- ❖ NASA discovers New Interstellar Comet 3I/ATLAS, confirmed by its Hyperbolic Non–Returning Orbit.
- ❖ Hyderabad–based Ananth Technologies will launch India's first private satellite broadband service.
- ❖ The European Southern Observatory (ESO) finds the first visual proof of a double detonation in a white dwarf star (SNR 0509–67.5).
- ❖ The Indian scientists created lanthanum–doped silver niobate to improve super capacitors.
- ❖ The Indian Institute of Science (IISc), Bengaluru has launched a large–scale study called BHARAT.
- ❖ Japan successfully launched the 50th and last H–2A rocket recently.
- ❖ The Scientists at the Raman Research Institute (RRI) of Bengaluru has found the teak leaf extract can protect eyes and sensors from strong laser rays.
- ❖ The United States of America (USA) is leading the world in 2025 by launching 8,530 satellites.
- ❖ INS Udaygiri, a stealth frigate under Project 17A, was delivered to the Indian Navy on July 1.
- ❖ A rocky area in northern Quebec, called the Nuvvuagittuq Greenstone Belt, may hold Earth's oldest rocks.
- ❖ India is developing the K–6, a nuclear–capable hypersonic missile launched from submarines.
- ❖ SatSure, an earth observation (EO) startup from Bengaluru, and Dhruva Space, a Hyderabad–based company, have partnered to offer the Earth Observation–as–a–Service (EOaaS) solutions.
- ❖ NASA has discovered a new exoplanet named TWA 7b, orbiting the young star TWA 7.
- ❖ The Penn State researchers of USA have developed the first computer fully made with 2D materials, not silicon.
- ❖ The Group Captain Shubhanshu Shukla became the first Indian to perform a scientific experiment aboard the International Space Station (ISS).

- ❖ ISRO has launched the NASA-ISRO Synthetic Aperture Radar Satellite (NISAR)– the most expensive civilian Earth observation satellite ever built.
- ❖ Turkey's Gazap is a 970 kg (2,000–pound) bomb dispersing 10.16 fragments per square meter, three times stronger than standard MK–series bombs.
- ❖ The NASA–Indian Space Research Organisation (ISRO) Synthetic Aperture Radar (NISAR) satellite mission cost over 1.5 billion USD.
- ❖ ISRO launched the Himalayan Outpost for Planetary Exploration (HOPE) mission in Tso Kar Valley, Ladakh.
- ❖ The Crew Interactive Mobile Companion (Cimon) is an artificial intelligence robot developed to support astronauts on the International Space Station.
- ❖ August 5, 2025, was shorter by 1.34 milliseconds than the standard 24 hours.
- ❖ WHO has officially classified the Hepatitis D virus (HDV) as carcinogenic.
- ❖ Scientists have identified the bacterium *Vibrio pectenicida* as the cause of sea star wasting disease.
- ❖ The Sea of Galilee in Israel has turned red because of a green algae species called *Botryococcus braunii*.
- ❖ Researchers discovered a new marine roundworm species *Admirandus odishaensis* in Chilika Lake.
- ❖ WHO certified Kenya as free of human African trypanosomiasis as a public health problem.
- ❖ Metop Second Generation A1 (Metop–SGA1) was successfully launched on from Europe's Spaceport in Kourou on an Ariane–62 rocket.
- ❖ Golden Dome (GD) is a U.S. missile defense system designed to protect against enemy intercontinental ballistic missiles (ICBMs).
- ❖ Northeast Frontier Railway (NFR) became India's first railway zone to use compostable bioplastic bags on trains.
- ❖ Scientists discovered PelV–1 a giant virus with the longest known tail near Hawaii.
- ❖ Pixxel Space India–led consortium will build India's first commercial earth observation (EO) satellite constellation.
- ❖ ISRO and Muskaan Foundation inaugurated a space lab at Government Higher Secondary School in Mechukha, Arunachal Pradesh.
- ❖ Researchers at IIT–Roorkee discovered Compound 3b to fight drug–resistant bacteria.
- ❖ Scientists have genetically engineered *Escherichia coli* bacteria to function as self–powered chemical sensors that produce electrical signals.

- ❖ Russia is preparing to test the 9M730 Burevestnik nuclear-powered cruise missile in Novaya Zemlya.
- ❖ Scientists at Stanford of USA have developed a brain-computer interface (BCI) that activates only when users think of a preset password.
- ❖ Ex-Twitter CEO Parag Agrawal launched a new AI startup called Parallel Web Systems.
- ❖ India will collaborate with a French company, likely Safran, to co-develop and produce engines for its fifth-generation Advanced Medium Combat Aircraft (AMCA).
- ❖ The F-47 is the next-generation air dominance fighter aircraft for the United States Air Force.
- ❖ The Indian Space Research Organisation (ISRO) is developing the Lunar Module Launch Vehicle (LMLV), its heaviest rocket ever.
- ❖ NASA's James Webb Space Telescope discovered Uranus' 29th moon, named S/2025 U1.
- ❖ The Indian Air Force used the AI-enabled X-Guard Fibre-Optic Towed Decoy system on Rafale fighters during Operation Sindoor to confuse enemy radar and missiles.
- ❖ ISRO has successfully conducted the first Integrated Air Drop Test (IADT-01) at Sriharikota.
- ❖ Scientists discovered a rare quadruple star system called UPM J1040-3551 AabBab.
- ❖ The first U.S. human case of New World screwworm was confirmed on August 4, 2025.
- ❖ The new rocket launch pad at Kulasekarapattinam, Thoothukudi district, will handle 20 to 25 satellite launches each year.
- ❖ Scientists have developed a new artificial intelligence model called the Hierarchical Reasoning Model (HRM).
- ❖ The Indian Council of Medical Research (ICMR) introduced CEREBO, a portable, non-invasive diagnostic tool for traumatic brain injury (TBI).
- ❖ India unveiled its first fully indigenous 32-bit microprocessor Vikram 3201 developed by the Indian Space Research Organisation (ISRO).
- ❖ The Vision, Language and Learning Group (VL2G) at the IIT Jodhpur develops artificial intelligence (AI) models for 13 Indian languages.
- ❖ The World Health Organization (WHO) released the 24th edition of the Model List of Essential Medicines (EML) and the 10th edition for children (EMLc).
- ❖ India has joined the HealthAI Global Regulatory Network (GRN) to promote the safe and effective use of artificial intelligence (AI) in healthcare.

- ❖ A total lunar eclipse, also called a Blood Moon, was observed across India on September 7, 2025.
- ❖ NITI Aayog's Frontier Tech Hub released the fourth edition of its Future Front Quarterly Insights series on two-dimensional (2D) materials.
- ❖ India has developed a rare reference material, Methandienone Long-Term Metabolite (LTM), through collaboration between NIPER Guwahati and NDTL.
- ❖ India has developed its first indigenous water-soluble fertiliser technology after seven years of research.
- ❖ The Indian Army used its indigenously developed secure mobile ecosystem, SAMBHAV (Secure Army Mobile Bharat Version), during Operation Sindoor.
- ❖ The Indian Space Research Organisation (ISRO) has achieved nine major world records in space exploration as of 2025.
- ❖ Scientists at Jawaharlal Nehru Tropical Botanic Garden and Research Institute (JNTBGRI), Kerala, developed a wound-healing pad using the red ivy plant.
- ❖ AIIMS New Delhi became the first government medical college in India to train on the da Vinci robotic surgical system.
- ❖ NASA's Solar Dynamics Observatory photographed a 5,00,000-kilometre-wide butterfly-shaped coronal hole on the Sun on September 11, 2025.
- ❖ The Ministry of Agriculture and Farmers' Welfare used AI to send monsoon forecasts to 3.8 crore farmers in 13 states in 2025.
- ❖ The WHO has added GLP-1 receptor agonists to its 24th Model List of Essential Medicines (EML) for type 2 diabetes.
- ❖ Sentient AI has launched an open-source Artificial General Intelligence (AGI) platform.
- ❖ ISRO will launch Vyommitra, an AI-powered half-humanoid robot, on its first uncrewed Gaganyaan mission in December 2025.
- ❖ Agnikul Cosmos has launched India's first private large-format 3D-printing facility for aerospace at the IIT-Madras Research Park in Chennai.
- ❖ Researchers at Stanford University and the Arc Institute created the world's first fully AI-designed functioning viral genome.
- ❖ Astronomers have confirmed the discovery of a new quasi-moon named 2025 PN7 orbiting near Earth.
- ❖ The DRDO and Strategic Forces Command (SFC) successfully tested the Agni-Prime missile.
- ❖ Wheat was successfully grown for the first time on desert land in Banseli village, Ajmer, using desert 'soilification' technology.

- ❖ A swarm of over 1,200 earthquakes in early 2025 revealed a shared magma source between Santorini Island and the nearby Kolumbo submarine volcano, located in Greece.
- ❖ India's first indigenously developed glycoprotein E (gE) deleted DIVA marker vaccine against infectious bovine rhinotracheitis (IBR) was launched recently.
- ❖ NASA and ISRO's joint NISAR (NASA-ISRO Synthetic Aperture Radar) satellite was launched from Sriharikota, India, to monitor Earth's surface changes in all weather and daylight conditions.
- ❖ The Border Security Force (BSF) is developing radar-mounted drones in collaboration with ISRO for border surveillance.
- ❖ Lecanemab is a lab-made antibody drug that slows early-stage Alzheimer's by targeting amyloid proteins in the brain.
- ❖ NASA's Interstellar Mapping and Acceleration Probe (IMAP) was launched aboard SpaceX's Falcon 9 rocket.
- ❖ False smut (haldi rog) is a fungal disease in rice caused by *Ustilaginoidea virens*, infecting crops during flowering.
- ❖ The Anusandhan National Research Foundation (ANRF), India's newest science funding agency, has developed a tool called SARAL.
- ❖ The Cassini spacecraft found new complex organic molecules in fresh ice grains ejected from Saturn's moon Enceladus.
- ❖ India is developing Dhvani, a Hypersonic Glide Vehicle (HGV), capable of flying above Mach 5 (over 7,400 kilometres per hour).
- ❖ The DRDO released Indian Radio Software Architecture (IRSA) version 1.0 in collaboration with the Integrated Defence Staff (IDS) and the Tri-Services.
- ❖ The Indian Army has inducted the indigenous Saksham Counter-Unmanned Aerial System (CUAS) Grid System for real-time drone threat neutralisation.
- ❖ China launched the world's first dual-tower solar-thermal power plant in the Gobi Desert.
- ❖ Caltech has developed the world's largest neutral-atom qubit array with 6,100 qubits, advancing towards error correction and large-scale quantum computing.
- ❖ The Finance Ministry has approved the construction of Maitri II, India's fourth research station in Antarctica.
- ❖ WHO has validated the Maldives for eliminating mother-to-child transmission (EMTCT) of hepatitis B.
- ❖ India's largest artificial intelligence (AI) data hub will be built in Andhra Pradesh.
- ❖ Astra Mark 2 is a Beyond Visual Range (BVR) air-to-air missile being developed by DRDO.

- ❖ The Military Combat Parachute System (MCPS) of DRDO, was successfully tested at 32,000 feet by Indian Air Force.
- ❖ Gaganyaan will use a Crew Escape System (CES) to safely eject astronauts during a launch emergency in the atmospheric phase.
- ❖ Astronomers have observed a developing ring system around Chiron, an icy centaur located between Saturn and Uranus.
- ❖ India has gifted Prussian Blue capsules to Indonesia for treating Cesium-137 contamination.
- ❖ Chandrayaan-2 payload makes first-ever direct observation of the Sun's coronal mass ejection impact on the Moon.
- ❖ The LCA (Light Combat Aircraft) Tejas Mk1A made its maiden flight at HAL's (Hindustan Aeronautics Limited) Nashik plant.
- ❖ Researchers have identified Sinapic acid, a naturally occurring plant compound, as a potential treatment for diabetic wounds.
- ❖ Chinese scientists discovered rare meteorite relics in lunar soil brought back by the Chang'e-6 mission.
- ❖ Fiji has been validated by the WHO for eliminating trachoma as a public health problem.
- ❖ Google Quantum AI's Willow chip has achieved the first-ever verifiable quantum advantage.
- ❖ Scientists have discovered a super-Earth exoplanet named GJ 251c.
- ❖ India has announced the development of an indigenous 7-nanometre processor, marking its entry into advanced semiconductor design.
- ❖ Russia successfully tested its nuclear-powered Burevestnik (9M730) cruise missile.
- ❖ China has developed a transparent, jellyfish-shaped bionic robot for stealth underwater exploration.
- ❖ INS Sutlej, an Indian Navy hydrographic survey ship, completed a 35,000 square nautical mile survey with the Mauritius Hydrographic Service.
- ❖ Scientists at the Indian Council of Agricultural Research National Institute of Animal Nutrition and Physiology (ICAR-NIANP), Bengaluru, developed a ready-to-use egg yolk-free solution called CRYODIL for cryopreserving buffalo semen.
- ❖ Hindustan Aeronautics Limited (HAL) and Russia's United Aircraft Corporation (UAC) signed an MoU for the production of the SJ-100 civil commuter aircraft.
- ❖ Elon Musk's AI company xAI has launched an AI-powered online knowledge database called Grokipedia.

- ❖ Hong Kong-based startup Stellerus Technology will deploy the Feilian Constellation, the world's first satellite network for three-dimensional wind data.
- ❖ A new mpox strain, clade Ib, is spreading in Europe.
- ❖ Scientists in Brazil launched the Amazon Free-Air Carbon Dioxide Enrichment (Amazon FACE) experiment near Manaus.
- ❖ The Researchers at the IIT-Madras have achieved a breakthrough in soft landing technology for vertical take-off aircraft and unmanned aerial vehicles (UAVs).
- ❖ CALIBRE Centre will be established by the National Centre for Biological Sciences and the International Centre for Theoretical Sciences, both part of the Tata Institute of Fundamental Research.
- ❖ China successfully launched the Shenzhou-21 mission to its Tiangong space station, carrying a three-member crew that includes the country's youngest-ever astronaut (32) and four laboratory mice, marking China's first in-orbit biological experiment involving rodents.
- ❖ Pravaig Dynamics of Bengaluru has launched the VEER EV, India's first indigenous electric vehicle designed for defence operations. It won the Innovation for Defence Excellence (iDEX) award for groundbreaking defence innovation.
- ❖ A University of Iowa (USA) study revealed the unexpected structure of the DNA repair protein RAD52.
- ❖ ISRO successfully launched CMS-03, India's heaviest (4,410 kg) communication satellite, on November 2, 2025.
- ❖ Russia has launched its newest nuclear submarine 'Khabarovsk', designed to carry the underwater nuclear drone 'Poseidon', also known as 'doomsday missile'.
- ❖ Scientists have directly detected Alfven waves in the Sun's corona for the first time.
- ❖ City-Killer Asteroid 2024 YR4 may collide with the Moon in 2032.
- ❖ Researchers at the Wadhvani School of AI and Data Science, Indian Institute of Technology-Madras (IIT-M), and The Ohio State University developed an AI framework named PURE (Policy-guided Unbiased Representations for Structure Constrained Molecular Generation) for Drug Discovery.
- ❖ Astronomers discovered GJ 251 c, a rocky exoplanet almost 4 times the mass of Earth, orbiting a nearby dwarf star less than 20 light-years away.
- ❖ The interstellar comet 3I/ATLAS is accelerating unexpectedly as it moves away from the Sun and toward Earth.
- ❖ IIT Madras Researchers have developed a low-cost, minimally invasive continuous glucose monitoring device.
- ❖ Alembic Pharmaceuticals has received final approval from the US Food and Drug Administration (USFDA) for its generic Dasatinib (Leukemia Drug) tablets.

- ❖ The USFDA has approved Linzess (Linaclotide) for children aged seven years and older with irritable bowel syndrome with constipation (IBS-C).
- ❖ NASA confirmed that Earth is experiencing its strongest geomagnetic storm of the year, classified as a G5 event.
- ❖ The NexCAR19, India's first indigenous Chimeric Antigen Receptor (CAR) T-cell therapy was launched recently.
- ❖ DRDO's Naval Science and Technological Laboratory (NSTL) in Visakhapatnam has developed new Man-portable Autonomous Underwater Vehicles (MP-AUVs) for mine countermeasure missions.
- ❖ India unveiled its first indigenous Quantum Diamond Microscope, developed under the National Quantum Mission by the P-Quest Group at IIT Bombay.
- ❖ Sentinel-6B an ocean-observing satellite was launched from Vandenberg Space Force Base, California, USA.
- ❖ OpenAI launched IndQA, a benchmark to evaluate AI systems on Indian languages, culture, and communication patterns.
- ❖ SS Innovations International, Inc., launched MantrAsana, the world's first portable robotic telesurgery system, developed entirely in India.
- ❖ The Oman Society of Astronomy and Space has successfully tracked and photographed Comet SWAN (Comet C/2025 R2 SWAN) across the country.
- ❖ Researchers reconstructed the Sun's polar magnetic fields using 100+ years of historical images from Kodaikanal Solar Observatory (KoSO).
- ❖ India launched its first indigenous CRISPR-based gene therapy for Sickle Cell Disease named BIRSA 101.
- ❖ The HAMMER is a precision-guided air-to-ground weapon jointly made in India by Bharat Electronics Limited and French based firm Safran.
- ❖ Gavi and UNICEF (United Nations Children's Fund) signed an agreement to make R21/Matrix-M malaria vaccines more accessible.
- ❖ The Prime Minister unveiled Vikram-I is India's first privately developed commercial orbital rocket, built by Skyroot Aerospace and inaugurated Skyroot's Infinity Campus in Hyderabad, a facility that can produce one orbital rocket per month.
- ❖ A 3.5-billion-year-old crater on Mars has been named after Indian geologist M.S. Krishnan and five Kerala-based names—Valiamala, Thumba, Bekal, Varkala, and Periyar—are now assigned to nearby craters and a Martian valley.
- ❖ Indian researchers from the S N Bose National Centre for Basic Sciences and Ashoka University developed an AI Framework for Cancer Therapy named OncoMark.

- ❖ India will set up four advanced quantum fabrication hubs under the National Quantum Mission at IIT Delhi, IIT Bombay, IIT Kanpur, and IISc Bengaluru.
- ❖ The ISRO has achieved another milestone with its Space Docking Experiment (SpaDeX) satellites successfully completing a second docking.
- ❖ India's first indigenous tetravalent dengue vaccine, DengiAll, has reached 50% enrolment in Phase 3 clinical trials.
- ❖ The Researchers in India at the Bose Institute of Kolkata have created a pineapple resistant to fungi by enhancing the AcSERK3 gene.
- ❖ GW250114, a gravitational wave event from the merger of two black holes was discovered.
- ❖ Google has launched a new computer chip named Ironwood.
- ❖ Turkey's Kızılelma unmanned aerial vehicle (UAV) became the world's first drone to shoot down an aircraft using a beyond-visual-range (BVR) missile.
- ❖ The Researchers at NCRA-TIFR (National Centre for Radio Astrophysics – Tata Institute of Fundamental Research) found a new spiral galaxy named Alaknanda.
- ❖ Scientists detected glucose; a six-carbon sugar used as energy in a sample returned by NASA's OSIRIS-REx spacecraft from asteroid Bennu in 2023.
- ❖ The Air-Sol Moyenne Portée-Renove (ASMPA-R) is the newest version of France's medium-range, supersonic, nuclear-capable ASMP cruise missile family.
- ❖ Israel-based startup Remilk will commercially launch lab-grown "cow-free" milk from January 2026.
- ❖ IIT Guwahati developed a material called Phase-Selective Organogelator (PSOG) which helps to detect Fuel Adulteration.
- ❖ Godrej Aerospace delivered the first human-rated Vikas engine to the ISRO for the Gaganyaan mission.
- ❖ China's Chang'e-6 mission discovered tiny iron oxide crystals in lunar soil.
- ❖ Europe conducted the world's largest planetary-defence drill, centred on tracking the near-Earth object 3I/ATLAS.
- ❖ ISRO's Aditya-L1 Joins Global Effort in Landmark Solar Storm Study.
- ❖ AIIMS New Delhi conducted India's 1st clinical trial of the Supernova Stent for stroke treatment.
- ❖ Maitri II is India's proposed next-generation research station in East Antarctica, expected to be completed by 2032.
- ❖ HAMMER (Highly Agile Modular Munition Extended Range), also called AASM (Armement Air-Sol Modulaire), is a precision-guided air-to-ground weapon.
- ❖ The Japanese researchers have experimentally confirmed ruthenium dioxide as an altermagnet.

- ❖ The James Webb Space Telescope discovered a lemon-shaped exoplanet named PSR J2322-2650b.
- ❖ Dark Eagle is a hypersonic missile system developed by the USA.
- ❖ Micrometeoroids and Orbital Debris (MMOD) are small natural and human-made objects moving around Earth at very high speeds.
- ❖ The DRDO has completed User Evaluation Trials (UET) of the Akash-NG missile system.

ENVIRONMENT

- ❖ The year 2024 is set to be the warmest on record, capping a decade of the unprecedented heat fuelled by human activities.
- ❖ Between 2005 and 2020, carbon emission was down by 7.93% compared to 2019, while emissions intensity reduced by 36%.
- ❖ Scientists have identified a new species of ant from the Western Ghats region in Kodagu district of Karnataka called *Tapinoma onaele*.
- ❖ The world's first cryo-born baby corals have been successfully settled into their new and natural homes on the Great Barrier Reef.
- ❖ The first-ever multi-taxon global freshwater fauna assessment for The IUCN Red List of Threatened Species conducted recently.
- ❖ The Scientists have identified a new species of Indo-Burmese pangolin (*Manis indoburmanica*) in Arunachal Pradesh.
- ❖ DDT or di-chloro-di-phenyl-tri-chloro-ethane was introduced as an insecticide in 1939.
- ❖ Water hyacinth, the world's most widespread invasive species, is blanketing the Lake Naivasha of Nairobi, Kenya.
- ❖ The Ganga River basin has an estimated population of 3,936 Gangetic dolphins (with a standard error of 763).
- ❖ The endangered Indian wolves are thriving very freely at the Bankapur Wolf Sanctuary of Karnataka.
- ❖ Researchers have identified 23 species of blood-sucking flies in the Andaman and Nicobar Islands, including 13 species previously unreported in India.
- ❖ Over 30.87 million hectares of wilderness were consumed by fire, an area roughly the size of state Maharashtra in India or Italy.
- ❖ The Olive Ridley turtles had skipped the River Rushikulya mouth in Odisha's Ganjam district in 2024 for the mass nesting.

- ❖ Two bird sanctuaries in Tamil Nadu's Ramanathapuram district — Sakkarakottai and Therthangal — have been designated as Ramsar sites.
- ❖ New Zealand has granted Mount Taranaki, now officially known as Taranaki Maunga, the same legal rights as a human being.
- ❖ A23a is the largest iceberg in the world was freed from the Filchner Ice Shelf in Antarctica.
- ❖ The International Big Cat Alliance (IBCA) has officially come into force as a treaty-based, inter-governmental organisation.
- ❖ The 2025 annual bird count at Pong Dam Lake Wildlife Sanctuary, recorded an unprecedented surge in waterfowl, with a total of 1,53,719 birds of 97 species.
- ❖ The Researchers have also recently discovered a new species of phytopathogenic fungi, *epicoccum indicum*.
- ❖ The Fentale volcano in Ethiopia has emitted vast amounts of methane into the atmosphere.
- ❖ The latest census has counted the vulture population in Madhya Pradesh at 12,981, an increase by 2,136 over the last census.
- ❖ COP16 to the Convention on Biological Diversity (CBD) in Rome have reached a historic agreement on financing global conservation goals.
- ❖ A new species of spined loach, officially named the *Cobitis beijingensis*, has been discovered in the Beijing area in China for the first time in over 40 years.
- ❖ India's first-ever riverine dolphin estimation report has recorded 6,327 dolphins across 28 rivers in eight states.
- ❖ Researchers of Indian Council of Agricultural Research (ICAR), have discovered a new species of Congrid eel and named it after Tamil.
- ❖ The World Economic Forum's Uplink supported ventures prevented 142,400 tonnes of carbon dioxide emissions over the past two years.
- ❖ Scientists may have discovered dozens of new species, on the newly exposed seafloor left behind by the A-84 iceberg that broke away from the George VI Ice Shelf.
- ❖ The number of big cats in the Nagarjuna Sagar-Srisailem Tiger Reserve (NSTR) in the Nallamala forest area in Andhra Pradesh has increased from 74 in 2023 to 76 in 2024.
- ❖ A new species of snakehead fish found from a remote stream in South Garo Hills.
- ❖ IUCN released its first Green Status assessment for the lion (*Panthera leo*).
- ❖ The Synchronised Vulture Survey 2025 was organised in the States of Tamil Nadu, Kerala, and Karnataka Forest Departments.

- ❖ The Thar Desert in India saw a striking 38 per cent rise in greening annually over the last two decades.
- ❖ The researchers have rediscovered a long-lost species of the velvet worms (the phylum Onychophora) after 111 years.
- ❖ A new species of damselfly Euphaea Wayanadensis has been discovered in the Wayanad landscape of the Western Ghats.
- ❖ The Villupuram Forest Division has planned to conduct a population study of the grizzled giant squirrel found in good numbers in the Pakkamalai and the Gangavaram hills.
- ❖ The newly found species Clidinium lalitae – Beetle are discovered in the Talle Valley Wildlife Sanctuary in Arunachal Pradesh.
- ❖ The world lost about 25,870 square miles (67,000 square kilometers) of primary rainforest in 2024.
- ❖ The Scientists have identified a new species of damselfly, Caliphaea Sinuofurcata, (Bearded Bronzeback) from Arunachal Pradesh.
- ❖ The Researchers discovered a new species of free-living marine nematode Pheronous jairajpurii Datta & Rizvi, a tiny worm-like creature, found on a sandy beach in Tamil Nadu.
- ❖ Scientists have discovered a small three-eyed predator called Mosura fentoni.
- ❖ A new butterfly species, 'Euthalia malaccana', has been recorded for the first time in Arunachal Pradesh's Leparada district.
- ❖ Nepal's Yala glacier is believed to be the first Nepalese glacier to be declared "dead".
- ❖ Researchers have discovered two new species of freshwater fish from the Western Ghats — Labeo uru and Labeo chekida.
- ❖ Ladakh hosts 477 snow leopards, two-thirds of the country's total population of these wild cats.
- ❖ In a first for India, the efforts are underway to get global sustainability recognition for the mud crab fishery in Chilika Lake.
- ❖ The recent survey in Periyar Tiger Reserve (PTR) have added five new amphibian species and three new reptile species to the region's records.
- ❖ A new species of gecko, believed to be present only around Coonoor, has been discovered in the Nilgiris in Tamil Nadu.
- ❖ A 2022 study found that India has lost \$127.3 billion (Rs 830 crore) to invasive alien species over the last 60 years.
- ❖ India has the fourth highest potential in the world to generate solar power from abandoned coal mines.

- ❖ Two new species of earthworms – *Kanchuria Tripuraensis* and *Kanchuria Priya Shankari*, have been officially discovered in Tripura.
- ❖ A new flowering plant species, *Portulaca Bharat*, has been discovered in the rocky and semi-arid landscape of the Aravali hills near Jaipur, Rajasthan.
- ❖ Researchers have identified a new species of jumping spiders of the *Spartaeinae* subfamily (*Spartaeus* and *Sonoita*) in southern India.
- ❖ More than one-fifth of the global ocean has considerably darkened in the last two decades.
- ❖ Zimbabwe has announced plans to cull at least 50 elephants in the Save Valley Conservancy.
- ❖ A new bat species, the Himalayan long-tailed myotis (*Myotis himalaicus*), has been discovered in the high-altitude forests of Uttarakhand.
- ❖ A new planarian worm species, *Dugesia punensis*, has been discovered in Pashan Lake, Pune.
- ❖ The insect, named *Spathaspina noohi*, belongs to the weevil family discovered from the forests of Meghalaya.
- ❖ Khichan in Phalodi and Menar in Udaipur have been designated as Ramsar sites recently.
- ❖ The Centre has officially designated an Eco-Sensitive Zone (ESZ) around the Tral Wildlife Sanctuary.
- ❖ *Calotes Zolaiking*, a species of garden lizard, was first described in 2019 in Mizoram's Aizawl district.
- ❖ India lost 18,200 hectares of primary forest in 2024, a slight increase from 17,700 hectares recorded in 2023.
- ❖ Nagshankar, in northeastern Assam's Biswanath district, has been designated a model temple for turtle conservation.
- ❖ A new species of cave-dwelling fish named *Schistura densiclava* was discovered in Meghalaya.
- ❖ The rare giant shrimp *Alicella gigantea* is occurring in 59% of the world's oceans.
- ❖ A new sea squirt species named *Clavelina Ossipandae* was discovered near Kumejima Island, Japan.
- ❖ Researchers have discovered a new species of wolf spider on Sagar Island in the Sundarbans delta.
- ❖ *Lantana camara* is now classified as an invasive alien species (non-native species causing ecological/economic harm).
- ❖ CIBA has successfully sequenced the genome of the gold-lined seabream (*Rhabdosargus sarba*).

- ❖ Rubber plantations in Kerala have been under threat from a beetle–fungus alliance.
- ❖ The scientists have documented and modelled a previously unrecorded escape movement used by newborn yellow anacondas.
- ❖ The Indian scientists have recently uncovered a previously unknown species of lichen, *Allographa Effusosoredica*, from Western Ghats.
- ❖ A new dragonfly species named *Lyriothemis Abrahami* has been discovered in the Western Ghats.
- ❖ A new butterfly species named *Zographetus Mathewi* has been discovered in the forests of Kerala's Western Ghats.
- ❖ The Standing Committee of the National Board for Wildlife (SC–NBWL) had recommended including the Gharial and Sloth Bear in the Species Recovery Programme.
- ❖ Under the Rhino DNA Index System (RhoDIS) India program, a specialised team has begun genetic analysis of samples from 2,573 rhino horns.
- ❖ Paris reopened the River Seine for public swimming for the first time since 1923 after a century–long sewage pollution issue.
- ❖ A new species of freshwater fish, *Pethia dibrugarhensis*, were identified in the Brahmaputra River near Dibrugarh, Assam.
- ❖ Sohra in Meghalaya, known as the world's wettest place, received only 1,095.4 mm of rain this June.
- ❖ The United States government plans to stop for funding the Mauna Loa Climate Observatory in Hawaii.
- ❖ On 30 June, Chile and Argentina became the coldest places on Earth outside the polar regions.
- ❖ *Garcinia kusumae* is a newly discovered tree species in Assam of Northeast India, locally called Thoikora in Assamese language.
- ❖ A rare roll cloud was spotted over a beach in Portugal during a heatwave.
- ❖ The Scientists found a rare behaviour in a magnetic material called chromium antimonide (CrSb).
- ❖ India has found 683 new animal species last year (459 newly discovered and 224 newly recorded).
- ❖ Ammonium sulphate is a key secondary pollutant in India's PM2.5 pollution.
- ❖ A new species of Begonia, *Begonia nyishiorum*, has been discovered in Arunachal Pradesh.
- ❖ Tamil Nadu government is spending ₹50 crore to restore Kariyachalli Island in the Gulf of Mannar, near Tuticorin.

- ❖ A new orchid species, '*Chamaegastrodia reiekensis*', discovered in the forests of Mizoram.
- ❖ Two new species of bush frogs '*Raorchestes jakoid*' and '*Raorchestes jadoh*' have been discovered in the Khasi Hills of Meghalaya.
- ❖ Kaziranga National Park and Tiger Reserve (KNPTR) in Assam now has 148 tigers, with a density of 18.65 tigers per 100 sq km, making it the third-highest globally.
- ❖ In the 2025 Southwest Monsoon (SWM) season, Meghalaya had a rainfall deficit of 56%.
- ❖ Kerala's Golden Jackal (*Canis aureus naria*) population is estimated between 20,000 and 30,000.
- ❖ In 2023, marine heat waves (MHWs) had covered 96 per cent of the global ocean surface.
- ❖ Tamil Nadu has recorded an estimated 1,303 Nilgiri Tahr in the second annual synchronised population survey.
- ❖ A new species of rain snake (*Smithophis leptofasciatus*), named the narrow-banded rain snake, has been discovered in a tropical forest of Mizoram.
- ❖ Two new species of freshwater crabs (*Kasargodia sheebae*, *Pilarta vaman*) from the Gecarcinucidae family have been discovered in Kerala.
- ❖ India's Asiatic lion population increased from 674 in 2020 to 891 in 2025, a growth of 32.2%.
- ❖ Two new damselfly species (Konkan Shadowdamsel, Crimson Shadowdamsel) were discovered in the Western Ghats of Maharashtra and Kerala.
- ❖ A rare nocturnal moth, *Antitritsuloides catocalina*, was discovered for the first time in the Western Ghats.
- ❖ The saltwater crocodile population in Sundarbans Biosphere Reserve (SBR) increased in 2025, with 213 direct sightings recorded.
- ❖ Eight firefly species (*Abscondita perplexa*, *Abscondita terminalis*, *Asymmetricata humeralis*, three *Curtos* species, *Lamprigera* sp. and *Pyrocoelia* sp.) have been identified in Anamalai Tiger Reserve through Tamil Nadu's first genetic study on fireflies.
- ❖ Two new soil-dwelling springtail species, *Salina aurantiamaculata* and *Salina pseudomontana* discovered in Kolkata
- ❖ Elathur Lake in Erode district has been officially notified as Tamil Nadu's third biodiversity heritage site.
- ❖ *Crocothemis erythraea*, an elusive dragonfly species, has been reconfirmed in high-elevation regions of the southern Western Ghats.
- ❖ A new tuber species named *Dioscorea balakrishnanii* has been identified in the Western Ghats region of Wayanad district, Kerala.

- ❖ Odisha's Debrigarh wildlife sanctuary to become India's newest tiger reserve.
- ❖ A new marine telemedicine helpline named Matsya has been launched by ReefWatch Marine Conservation in Tamil Nadu.
- ❖ The Giant African Snail (*Lissachatina fulica*) has been detected in parts of Chennai and surrounding areas.
- ❖ Researchers from the MACS-Agharkar Research Institute, Pune, identified two novel species of *Aspergillus* section Nigri (commonly known as black aspergillus), *Aspergillus dhakephalkarii* and *Aspergillus patriciauwiltshireae*, from soil samples in the Western Ghats.
- ❖ A new species of bent-toed gecko named *Cyrtodactylus vanarakshaka* has been discovered in Assam's Dima Hasao district.
- ❖ The Tamil Nadu Forest Department has created a new mangrove belt on Battle of Adyar Island in the Adyar Estuary.
- ❖ A new species of freshwater fish named *Garra nambashiensis* was discovered in the Taretlok River in Manipur's Kamjong district.
- ❖ Scientists have discovered a new species of deep-sea coral *Iridogorgia chewbacca* in the tropical western Pacific Ocean.
- ❖ Researchers from have discovered a new species of finless snake eel *Apterichtus kanniyakumari*.
- ❖ The IUCN World Conservation Congress 2025 in Abu Dhabi adopted a motion recognising India's Dugong Conservation reserve.
- ❖ The tiger population in Achanakmar Tiger Reserve (Chhattisgarh) rose from 5 in 2022 to 18 in 2025 after the arrival of tigress Jhumri from Bandhavgarh.
- ❖ Researchers discovered a new plant species *Impatiens selvasinghii* in Kudremukh range of the Western Ghats, Karnataka.
- ❖ Gokul Jalashay (Buxar) and Udaipur Jheel (West Champaran) in Bihar have been added to the Ramsar list of wetlands of international importance.
- ❖ Mukhi, an India-born female cheetah, will become the first to reach adulthood at Kuno National Park.
- ❖ The Cold Desert Biosphere Reserve in Himachal Pradesh was added to UNESCO's World Network of Biosphere Reserves.
- ❖ CSIR-AMPRI (Council of Scientific and Industrial Research – Advanced Materials and Processes Research Institute) designed and developed a SODAR (Sound Detection and Ranging) system facility.
- ❖ A new coffee plant species *Ophiorrhiza echinate* was found in the Western Ghats.
- ❖ The National Biodiversity Authority (NBA) has sanctioned ₹82 lakh to the Andhra Pradesh Biodiversity Board for Red Sanders (*Pterocarpus santalinus*) conservation.

- ❖ India generated 2.2 million tonnes of e-waste in 2025 with a 150% increase since 2017–18.
- ❖ Swiss glaciers lost 3% of their volume in 2025 due to low snowfall and heatwaves in June and August.
- ❖ The snow leopard population in Himachal Pradesh has risen by 62 percent in four years, reaching 83 in 2025.
- ❖ The Philippines has set up Southeast Asia's first coral larvae cryobank.
- ❖ India unveiled its first Red List of Endangered Species at the IUCN (International Union for Conservation of Nature) World Conservation Congress 2025.
- ❖ A new species of wasp named *Nesolynx banabitanæ* was discovered in Central Park, Salt Lake, and Kolkata.
- ❖ A new fungus species named *Bridgeoporus kanadii* has been discovered in Arunachal Pradesh.
- ❖ Armenia became the newest State Member of IUCN during the 2025 IUCN World Conservation Congress in Abu Dhabi.
- ❖ The Wildlife Trust of India (WTI) released a report titled *Guardians of the Wild: Supporting India's Frontline Forest Staff* in Abu Dhabi.
- ❖ The IUCN classifies the tiger as 'critically depleted' across much of its indigenous range in Asia.
- ❖ The IUCN has updated its Red List, now tracking 172,620 species, of which 48,646 are threatened with extinction.
- ❖ A new study by Stanford University found that snow leopards have the lowest genetic diversity of any big cat, even lower than cheetahs.
- ❖ India's wild elephant population is now estimated at 22,446 according to the first DNA-based national count conducted in 2025.
- ❖ A new balsam flower species- *Impatiens rajibiana* is discovered in Shergaon, West Kameng district, Arunachal Pradesh.
- ❖ The IUCN has categorized the Western Ghats, Manas National Park in Assam, and Sundarbans National Park in West Bengal as sites of "significant concern."
- ❖ World Meteorological Organisation report published in 21st annual Greenhouse Gas Bulletin.
- ❖ A new species of hairy snail named *Lagocheilus hayaomiyazakii* found in the semi-evergreen Tilari forest of Kolhapur district, Maharashtra.
- ❖ The International Dugong Conservation Centre is planned by the forest department at Sarabendrarajan pattinam village in Pattukottai taluk, Thanjavur district.

- ❖ The blackbuck was declared locally extinct in Chhattisgarh in 2017 due to poaching and habitat loss.
- ❖ Tuvalu has become the 90th State Member of the IUCN.
- ❖ Russia, China, and the United States led global carbon sequestration on forest land, recording annual removals of 1,150 Mt CO₂, 840 Mt CO₂, and 410 Mt CO₂, respectively, in 2021–25.
- ❖ The Central Asian Mammals Initiative (CAMI) is a transboundary conservation program under the Convention on the Conservation of Migratory Species of Wild Animals (CMS).
- ❖ The IUCN has adopted Motion 007 on Soil Security Law, creating the world's first model legal framework for soil protection.
- ❖ A new genus of Patithelphusa and its species of freshwater crab, Patithelphusa yercaudensis, have been identified from the Shevaroy Hills in Yercaud, Salem district.
- ❖ Madhya Pradesh's Nauradehi Wildlife Sanctuary will become the third home for cheetahs in the state after Kuno National Park and Gandhi Sagar Sanctuary.
- ❖ To protect the endangered Olive Ridley Sea turtles during their mating and nesting season, a 7-month fishing ban is in effect from November 1 to May 31 in Gahirmatha Marine Sanctuary in Kendrapada, Odisha.
- ❖ A rare Atlas Moth, one of the largest in the world with a 25–27 cm wingspan, was recently spotted in Karwar, Karnataka, in the Western Ghats.
- ❖ The Shillong–Dawki corridor construction project caused the poor quality of the Umngot River water.
- ❖ Khangchendzonga National Park is the only Indian site rated as “good” by the IUCN.
- ❖ India will join the Tropical Forest Forever Facility (TFFF) as an observer ahead of COP 30.
- ❖ To prevent illegal capture, cruelty, and exploitation of the macaques, the standing committee of the National Board for Wildlife has recommended reinstating the Rhesus Macaque under Schedule II of the Wildlife (Protection) Act, 1972.
- ❖ Greek scientists are using mussels to detect increasing microplastic pollution in the Mediterranean Sea.
- ❖ In the Mudumalai Tiger Reserve (MTR), researchers recorded over 10,000 Terminalia arjuna ('Neer Maruthu') trees along the Moyar River, which serve as crucial shelter for the critically endangered White-rumped Vulture (Gyps bengalensis).

- ❖ Countries around the world have agreed under the Minamata Convention on Mercury to completely stop using mercury-based dental amalgam by the year 2034.
- ❖ COP29 in Baku set the Baku to Belém Roadmap, aiming to mobilize \$1.3 trillion in annual climate finance for developing nations by 2035.
- ❖ The Supreme Court directed Jharkhand to declare 31,468.25 hectares of the Saranda forest as a wildlife sanctuary.
- ❖ *Moema claudiae*, a seasonal killifish species, was rediscovered in Bolivia.
- ❖ The cane toad, scientifically known as *Rhinella marina*, is one of the world's most invasive species, disrupting ecosystems.
- ❖ Scientists have identified a new tropical filter-feeding pterosaur species named *Bakiribu waridza* inside fossilised dinosaur vomit is known as regurgitalite.
- ❖ The Integrated Forum on Climate Change and Trade (IFCCT) was formally opened by the COP 30 Presidency.
- ❖ Scientists in Thailand have discovered a new spider species named *Damarchus inazuma*.
- ❖ Scientists recovered ancient ribonucleic acid (RNA) from a 39,000-year-old woolly mammoth preserved in Siberian permafrost.
- ❖ The Integrated Forum on Climate Change and Trade (IFCCT) was launched at COP30 in Belém, Brazil.
- ❖ A wild tiger has permanently settled in Ratanmahal Wildlife Sanctuary, Gujarat, for nine continuous months. Thus, Gujarat become the only place in India where all three big cats live together in the same natural landscape.
- ❖ The Belém Package, a group of 29 climate decisions adopted at COP30 in Belém, Brazil.
- ❖ The Antarctic ozone hole in 2025 was the 5th smallest since 1992, reported by NASA and National Oceanic and Atmospheric Administration (NOAA).
- ❖ Nearly 70% of corals at the UNESCO-listed Ningaloo Reef, Western Australia, have died.
- ❖ 141 years old Gramma the Galápagos Tortoise died recently.
- ❖ Researchers from the Central Marine Fisheries Research Institute (CMFRI), Kochi, discovered a new deep-sea squid species in the Arabian Sea, named *Taningia silasii* after marine biologist E. G. Silas.
- ❖ Scientists have identified a new species of coelacanth (249-million-year-old Fish) from early Triassic deposits in China's Anhui province.
- ❖ The Belem Health Action Plan (BHAP), the first international climate adaptation framework dedicated specifically to health was launched at COP30.

- ❖ The Food Waste Breakthrough was officially launched at COP30 in Belém, Brazil.
- ❖ The Researchers discovered two species of goby fish – Hemigobius hoevenii and Mugilogobius tigrinus at the Coringa wildlife sanctuary near Kakinada in Andhra Pradesh.
- ❖ The bamboo shrimp (*Atyopsis spinipes*) has been rediscovered in Karnataka and Odisha after 72 years
- ❖ A new damselfly species named Kodagu Shadowdamsel (*Protosticta Soorya Prakashii*) was discovered in the Western Ghats.
- ❖ New snake species called *Lycodon irwini*, has been discovered in India's Nicobar Islands.
- ❖ A new species of giant stick insect *Acrophylla alta* has been discovered in tropical rainforest in Far North Queensland.
- ❖ A new shieldtail snake species, *Rhinophis siruvaniensis*, was discovered with help from citizen scientists in the Siruvani Hills.
- ❖ Scientists discovered a new species of snakehead fish named Channa Bhoi in Meghalaya.
- ❖ Scientists discovered a new species of Collembola (springtails) in the high-altitude region of Sikkim.
- ❖ The blackbuck (*Antelope cervicapra*) population in Vallanadu sanctuary, Tamil Nadu, increased to 300 in the 2023–2024 census, up from 260 in 2022–2023.

REPORTS AND INDICES

Report	Organization	Top	Bottom	India's position
Corruption Perceptions Index (CPI) 2024	Transparency International	Denmark	–	96
Glass-Ceiling Index 2025	–	Sweden	–	–
Global Terrorism Index 2025	–	Burkina Faso	–	14
World Happiness Rankings 2025	–	Finland	–	118

Top 10 largest economies in the world 2025	–	United States of America	–	4
Top 10 countries with the highest debt-to-GDP in 2025	International Monetary Fund's (IMF)	Sudan	–	31
World Press Freedom Index – 2025	Reporters Without Borders (RSF)	Norway	Eritrea	151
Human Development Index 2025	UNDP	–	–	130
Top 10 most spoken languages in 2025	–	English	–	Hindi (3 rd), Bengali (7 th), Urdu (11 th), Marathi (16 th), Telugu (18 th)
Strongest Currencies in the World – 2025	–	Kuwaiti Dinar (KWD)	–	–
Child Wellbeing in an Unpredictable World	UNICEF	Top three countries: Kingdom of the Netherlands, Denmark and France	–	–
Countries with the highest life expectancy	–	Monaco	–	–
Gender Gap Index 2025	WEF	Iceland	Pakistan (148), Sudan, Chad and Iran	131
WEF Energy Transition Index 2025	–	Sweden, Finland and Denmark	–	71
2025 Global Peace Index	Institute for Economics and Peace (IEP)	Iceland	Russia	115 th

Sustainable Development Report (SDR)	UN Sustainable Development Solutions Network	–	–	99
Global Unicorn Index 2025	Hurun Research Institute	United States	–	3
